ABOUT ME

Senior Full Stack Engineer with 7+ years of experience developing scalable SaaS and enterprise applications using React, TypeScript, and Node.js. Experienced in delivering end-to-end features across frontend and backend systems, including REST API integration, database interaction, and performance optimization. Strong focus on clean architecture, reusable component design, and unit testing using Jest and Vitest. Comfortable contributing to technical discussions, improving code quality standards, and collaborating within agile cross-functional teams.

Open to relocation to Germany with an employer-sponsored EU Blue Card.

WORK EXPERIENCE

GlobalLogic – Noida, India

Associate Consultant

[24/02/2025 – Current]

- Contributing to the development and enhancement of the Calabrio enterprise workforce management platform serving global enterprise clients.
- Developing complex, data-intensive scheduling systems using React and TypeScript, handling large datasets and real-time updates.
- Designing scalable frontend architecture and reusable component libraries for calendar-based and workforce planning modules.
- Collaborating with backend teams to refine REST API contracts, optimize payload structures, and improve data flow efficiency.
- Contributing to backend improvements including API response restructuring and performance tuning.
- Implementing unit and component testing using Vitest and Jest to maintain code reliability and quality standards.
- Improving application performance through optimized state management, memoization, and efficient data transformations.
- Participating in system design discussions, code reviews, and technical decision-making within agile cross-functional teams.
- Recognized with Spotlight of the Month Award for technical ownership and impactful contributions.

Lucida Technologies Pvt. Ltd. – Bangalore, India

Software Developer

[13/09/2022 – 19/02/2025]

- Developed full stack web applications using React, Node.js, and NestJS
- Designed REST APIs and integrated backend services with frontend systems
- Worked with MySQL and MongoDB for data modeling and query optimization
- Improved backend performance by optimizing database queries and reducing API latency
- Implemented authentication flows and handled role-based access control
- Contributed to CI/CD processes and participated in production deployments
- Mentored junior developers and promoted clean coding practices
- Awarded Star of the Department for technical excellence

Agami Technologies Pvt. Ltd. – Greater Noida, India

Software Specialist

[05/03/2019 – 08/09/2022]

- Built dynamic user interfaces using React and integrated REST APIs
- Developed backend services using Node.js and improved API efficiency
- Optimized SQL queries and enhanced database performance
- Participated in feature planning, system design discussions, and deployment cycles
- Collaborated with cross-functional teams to deliver client-focused solutions
- Received appreciation for teamwork and consistent delivery quality

EDUCATION AND TRAINING

Bachelor of Technology (B.Tech) – Computer Science

I.K. Gujral Punjab Technical University (IKGPTU) [01/07/2015 – 30/04/2018]

Country: India | **Level in EQF:** EQF level 6

SKILLS

Frontend: React, JavaScript, TypeScript, Tailwind CSS, HTML5

Backend: Node.js, NestJS, REST APIs

Databases: MongoDB, MySQL

State: React Query, Zustand, Redux

Tools: Git, GitHub, Bitbucket, Jira, Azure DevOps

Testing: Jest, Vitest

LANGUAGES

English – C1
Hindi – Native
Punjabi – Native
